

Chiplite NEON Flex *easy*

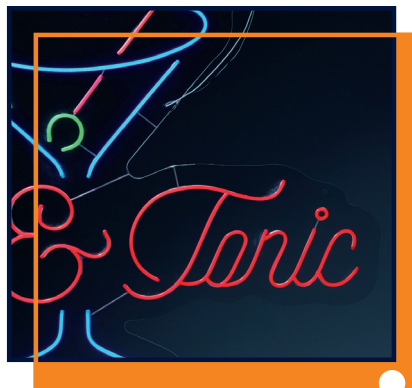

Neon Look letters easy made

The new Chiplite Neon Flex easy is the simple way to realize indoor lettering that looks like neon. The NeonFlex is fully installed and wired on a 5 mm thick clear acrylic glass carrier (contour cut or square), so that the sign only needs to be hung. It is available in twelve different colors. The Neon Flex is available in two different thicknesses 6 or 8 mm. It can be made as an outline or centerline letter. The system has an operating voltage of 12 volts and a power consumption of 9 watts per meter. All we need is a vector graphic with dimensional and color details and your Neon Flex easy logo can be produced in a short time.

Text and design will be implemented according to your specifications. Here are three examples:

The Neon Flex easy lettering in warm white with variable text is mounted on a 5 mm shaped cut acrylic glass carrier. The example lettering "Coffee" is 710 mm long and costs 230,00 Euro.

Consisting of red, green and blue Neon Flex easy which has been installed on a 5 mm thick acrylic glass carrier. The cost of this logo "Tonic" in a width of 450 mm amount to 364,00 Euro.

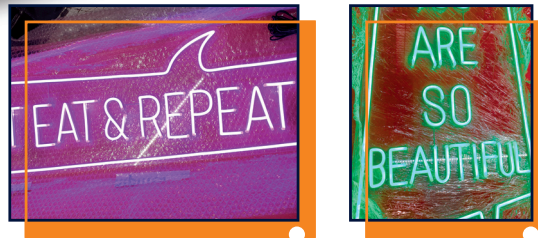

The green Neon Flex easy lettering is installed on a contour-cut 5 mm thick acrylic glass panel. The 850 mm long pattern lettering "Snack" costs 245,00 Euro.
